EDUCATION

Carnegie Mellon University

Pittsburgh, PA

Bachelor of Science in Information Systems; Minor in Software Engineering

May 2028

- **Relevant Coursework:** DSA, Software Engineering, Database Systems, Information Security, Application Development, Discrete Mathematics, Probability & Statistics, Linear Algebra, Calculus in Three Dimensions

EXPERIENCE

Software Engineering & IT Intern

May 2026 – Present

Nemacolin Resort

Farmington, PA

- Collaborated with **15+ stakeholders** to gather software requirements, analyze enterprise workflows, and validate technical specifications for software supporting **200+ users**
- Supported **1000+ devices** across enterprise infrastructure; troubleshoot production issues and drove process improvements across **10 IT workflows** spanning asset, ticketing, licensing, and provisioning operations

IT Consultant

July 2025 – Present

Soroban Capital Partners LP

New York City, NY (Remote)

- Validated **50+ AI-generated** financial transcripts for speaker attribution, financial terminology, and numerical accuracy supporting executive communications and investment research workflows
- Performed QA on **125+ hours** of machine-generated content, identifying recurring transcription errors and improving output reliability across high-priority investor-facing financial materials

AI & Software Development Teaching Assistant

June 2025 – Present

The 5th C Academy

Los Altos, CA (Remote)

- Mentored **100+ students** across AI and software development programs through instruction, debugging, mentorship, and individualized feedback on each student capstone project
- Instructed students in full-stack development (Python, JavaScript, HTML/CSS, RESTful APIs, databases) and AI concepts (neural networks, LLMs, prompt engineering, model integration) for end-to-end applications

Founder & Owner

June 2022 – Present

Pajerski Precision Detailing

Uniontown, PA

- Founded and scaled independent detailing business, completing **50+ client engagements** and generating **\$5,000+ in revenue** via customer acquisition, pricing strategy, and operational execution
- Directed marketing, scheduling, and client relations; built referral base with **~80% referrals** and **95% retention**

PROJECTS

Nemacolin IT Resource Dashboard

May 2026 – Present

- Architected and developed full-stack platform using **Ruby on Rails** and **PostgreSQL** with **RESTful APIs**, **RBAC**, and workflows for assets, ticketing, licensing, knowledge base, and administration
- Implemented secure, maintainable services with authentication, audit logging, and real-time UI via Hotwire, Turbo, Stimulus, and Tailwind CSS for **20+ admin users**

OnlyOdds

October 2025 – Present

- Engineered a real-time mobile microprediction platform using **React Native** and **Supabase**, architecting event-driven, low-latency state synchronization for concurrent users across scalable prediction markets
- Implemented **10+ core features** with scalable architecture including authentication, market creation, client-side caching, conflict resolution, and live state synchronization

Pins & Pieces

March 2025 – April 2025

- Engineered Python recommendation engine using image processing, automated tagging, and custom **backtracking algorithm** to generate optimized outfit selections under user-defined constraints

TECHNICAL SKILLS

Languages: Python, JavaScript, Ruby, SQL, C, HTML/CSS

Frameworks & Technologies: React, React Native, Ruby on Rails, Tailwind CSS, Hotwire, Turbo, Stimulus

Databases & Backend: PostgreSQL, Supabase, SQLite, MySQL, MongoDB, RESTful APIs

Developer Tools: Git, GitHub, Linux, Netlify
