EDUCATION

Carnegie Mellon University

Pittsburgh, PA

Bachelor of Science in Information Systems; Minor in Software Engineering

May 2028

- Relevant Coursework: Data Structures and Algorithms, Software Engineering, Database Systems, Information Security, Application Development, Discrete Mathematics, Probability and Statistics, Linear Algebra.

EXPERIENCE

Software Engineering and IT Intern

May 2026 – Present

Nemacolin Resort

Farmington, PA

- Designed and built an internal **Ruby on Rails 8 application** to centralize IT resources, links, and documentation for **20+ administrators**.
- Implemented bcrypt authentication and role-based access control with CanCanCan, including Admin, Manager, Editor, and Viewer roles and per-record visibility controls.
- Modeled a **normalized PostgreSQL database** with foreign keys, indexes, soft deletion, audit trails, and full-text search using pg_search.
- Achieved **100% line coverage across 800+ RSpec examples** and configured GitHub Actions to run tests, Brakeman, and bundler-audit before deployment to a restricted internal Linux server.

IT Consultant

July 2025 – Present

Soroban Capital Partners LP

New York City, NY (Remote)

- Audited **125+ hours across 50+ AI-generated financial transcripts** for speaker attribution, financial terminology, and numerical accuracy in investor-facing materials.
- Documented recurring error patterns to standardize human review of AI-generated financial content.

AI and Software Development Teaching Assistant

June 2025 – Present

The 5th C Academy

Los Altos, CA (Remote)

- Mentored **100+ students** through full-stack and AI application development, providing debugging support, code review, and individualized capstone guidance.
- Taught Python, JavaScript, REST APIs, databases, LLMs, prompt engineering, and model integration for end-to-end applications.

Founder and Owner

June 2022 – Present

Pajerski Precision Detailing

Uniontown, PA

- Founded a detailing business that completed **50+ client engagements**, generated **\$5,000+ in revenue**, earned 80% of new business through referrals, and achieved 95% customer retention.

PROJECTS

OnlyOdds

October 2025 – Present

- Built a **React Native and Supabase application** that enables users to create prediction markets, place predictions, and follow live market updates.
- Implemented **10+ features** using Supabase authentication, real-time database subscriptions, client-side caching, and conflict-resolution logic.

Pins & Pieces

March 2025 – April 2025

- Built a Python outfit recommendation engine using image processing, automated garment tagging, and a **custom backtracking algorithm** to generate combinations under user-defined clothing constraints.
- Developed an image-processing pipeline to convert wardrobe photos into structured garment attributes for recommendation generation.

TECHNICAL SKILLS

Languages: Python, JavaScript, Ruby, SQL, C, HTML/CSS, Bash

Frameworks: Ruby on Rails, React, React Native, Hotwire, Turbo, Stimulus, Tailwind CSS

Databases and Platforms: PostgreSQL, Supabase, SQLite, MongoDB

Testing: RSpec, FactoryBot, SimpleCov

Security: CanCanCan, Brakeman, bundler-audit

Tools and Infrastructure: Git, GitHub, Linux, GitHub Actions, systemd
